

Number of
Visitors to
Tourist
Attractions
in 2024

tourdata.cz

Many thanks to the destination management organizations and the Regional authorities for their cooperation.

Methodical note:

The overview of visitor figures for the tourist attractions was compiled based on a survey of visitors to more than 1 300 tourist attractions, in collaboration with Regional coordinators and destination management organizations. Even so, this is not an exhaustive list and so might not include certain sites. The data is based on figures provided by the operators of the individual tourist attractions on the total number of registered visitors, regardless of whether or not they paid admission. The data includes figures for visitors from Czechia and abroad.

If the operator of two or more individual sites has provided aggregate visitor figures, they are listed in the “combined tourist attractions” category. A set of tourist attractions promoted under one marketing brand is generally listed under the name of the main site or the operator’s name.

The overview is merely indicative and is not intended to rate the performance of the individual attractions or operators. The aim is to create a unified database and support less frequented tourist attractions.

The Hidden Gems highlight lesser-known yet valuable tourist destinations across Czechia each year, featuring places with the potential to attract a broader audience. These attractions are nominated by the Region to which they belong.

* registered number of paying and non-paying visitors
